EDUCATION

Bachelor of Science in Computer Science Princess Norah bint Abdulrahman University

Riyadh, Suadi Arabia

Courses

- Algorithms
- Java
- Computer Architecture
- Data Structures
- Artificial Intelligence (AI)
- Web application development

COLLEGE PROJECTS

encryption program

Course: information security

09/2023 - 10/2023

using java

The scanner initializes, requests for user input, eliminates spaces, calculates key size, creates a random key, transforms plaintext to binary, encrypts using XOR, uses P-box transformation, decrypts, reverses, and shows the results.

Achievements/Tasks

- Optimized Decryption Performance
- Implemented Secure Data Encryption
- Resolved Vulnerabilities
- Collaborated on Cryptographic Protocols

Task Managment System

Course: Advanced Programming Language

09/2023 - 10/2023

The system includes a task management tool for effectively planning and organizing tasks, objectives, and events, as well as information on inheritance, polymorphism, interfaces, and exception handling.

Achievements/Tasks

- Team work
- exception handling
- GUI
- LINQ

TECHNIQUAL SKILLS

Javascript

react

HTML5

CSS3

Java

C#

DBMS

MySQL

git & github

CERTIFICATES

DFo Database Foundations Learner (02/2024 - 04/2024)

Master database design concepts, use a modeling tool to build databases and get familiar with SQL to deploy and query databases through hands-on, entertaining challenges.

The Git & Github Bootcamp - udemy (03/2024 - 03/2024)

Master Git workflow, including adding, committing, merging, diff, stashing, uno, and collaboration. Familiarize yourself with Git objects, rebase history, and use Git tags for hosting static websites.

The Complete 2024 Web Development Bootcamp - udemy (02/2024 - Present)

Learn HTML, CSS, Javascript, Node, React, PostgreSQL, Web3, and DApps. Develop Multiple projects, create websites, understand frontend and backend programming, and discover professional developer best practices.

Introduction to Artificial Intelligence (AI) - Coursera (Authorized by IBM) (03/2024)

Completed an IBM-approved online AI course, which provided a thorough grasp of ideas, applications, ethical issues, and career paths in AI, data science, machine learning, and deep learning.
